TRISH (Thoughtful Reasoning Intelligence system for Humans) is an open-source group discussion platform powered by Generative AI. Developed by Ayush verma, the current President of the Debate Club, TRISH aims to enhance student discussions by addressing common issues like uneven participation and lack of clarity. It is now being used to make club activities more interactive and impactful.

### Key Features:

- Create private discussion rooms
- Set discussion timers
- Multi-user participation
- AI-generated conclusions
- Downloadable PDF summaries
- Text-to-speech support
